EVOLUTION BOATS

INNOVATE NOT IMITATE

BUILT BY
PM MARINE
MANUFACTURING

www.pmmarine.com.au

Built by fishermen with the fishermen in mind the Evolution 550 cuddy will exceed boating expectations.

The 21° dead rise, wide reverse chines allow for smoothness while underway and rock solid stability at rest. The full height transom has built in tackle boxes, flush opening doors to expose easy access to twin batteries, oil bottle and massive facilities, as well as a host of other fishing essentials.

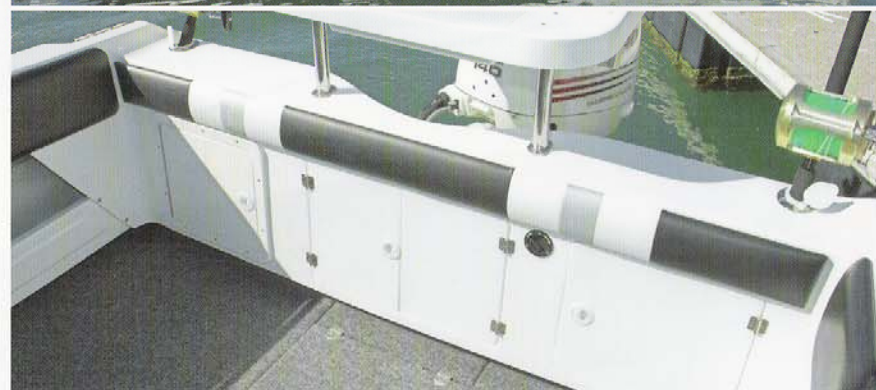

The massive 2100mm internal

measurement at the transom is one of the widest in its class. However, the Evolution 550 cuddy can still be towed with ease by the average family 6-cylinder car without the need for an expensive 4-wheel drive.

Whether fishing 20–30 km off shore, in one of many bays and estuaries, water skiing with family and friends or just cruising, the Evolution 550 cuddy will meet all your boating and family needs.

But don't take our word for it, get out and give it a go for yourself.
